- Attach to any Picatinny rail using patented, self-adjusting Quick Release HT Mount
- Visible green laser
- Submersible to 10 m for 2 hours

## Product Description

Available for the commercial market, the first eye-safe IR laser pointer, IR illuminator and green laser pointer in a single compact unit. Features an adjustable IR illuminator for better illumination at longer ranges, dual activation switches and high/low power modes. The DBAL-A3 civilian model is based on the standard issue DBAL-A3 for U.S. warfighters. And just like the restricted models, this unit offers the latest advances in IR and visible laser technology. The dual-beam infrared laser and illuminator combination is extremely accurate in low- and no-light maneuvers. In addition, the DBAL-A3 is the first to feature new defocused adjustable IR illumination technology to enable both midrange and close quarter target acquisition. The visible green laser's direct diode allows for cold weather operation as low as -20 degree C.
